MORE THAN JUST ACCESS CONTROL

A unified security management platform

Finally, an access control
solution that's flexible
and scalable and puts
customers in control.

eFusion

MAXXESS

eFusion

Feature-rich access control enabling seamless integration

Maxxess eFusion is a feature-rich access control system that easily integrates with a wide range of surveillance, intruder, access, fire and other monitoring and detection systems.

Supporting unlimited workstations, cardholders, and card readers, eFusion enables comprehensive monitoring and reporting on a single, unified dashboard. Streamlining operations, it combines data and input from legacy and stand-alone physical security systems.

INTEGRATION
Integrates off-the-shelf with leading video tech vendors using industry standard OEM controllers.

DATABASE MANAGEMENT
Allows enterprise-wide data integration through Active Directory.

MOBILE CREDENTIALS
Enables mobile identification and verification with one time passwords and two-factor authentication.

DATA SECURITY
Features AES 128-bit data encryption that supports FIPS-compliant cards and card readers.

CONTACTLESS & FRICTIONLESS
Supports Assa Abloy Aperio and Vingcard wireless door locks with integrated RFID card readers. Integrates with biometric time & attendance solutions.

SECURITY MANAGEMENT
Collects and correlates events from multiple security devices and information systems for enhanced situational awareness and complete control.

A unified security management platform

Maxxess can supply all your hardware and software needs – or integrate with legacy systems such as Mercury controllers – to give you truly cost-effective access control with scalability to meet your current and future security needs with full redundancy.

With eFusion, Maxxess gives you a powerful software platform with a wide range of impressive features and functionality, including:

- support for multiple workstations and an unlimited number of readers
- interactive graphical floor plans
- a browser-based identity management module
- email on alarm or designated system event, and much more

eFusion can integrate with over 20 leading video surveillance brands, along with door access, intercom, ID badging and building management systems

It provides support for card technologies, biometrics, mobile credentials, and wireless access control devices, making it the go-to access control system for integration with existing legacy systems or multiple cutting-edge applications and hardware.

Control on-the-move with Maxxess eFusion mobile apps

The advanced suite of Maxxess eFusion mobile apps can be tailored to your precise operational needs, giving you a choice of top-level capabilities covering a wide range of key functions - wherever you are. The latest tools and functions include:

VEHICLE MANAGEMENT

Streamline arrivals with parking space allocation and minimise disruption with efficient vehicle routing across your sites.

QR-ACCESS

A more efficient, more secure and more flexible access solution than traditional cards and keys

TIME & ATTENDANCE

Manage employee rosters more efficiently, and keep flexible control over mobile and floating workforces.

VISITOR MANAGEMENT

Ensure an impressive experience for all site visitors, with no queuing, secure access to physical spaces and corporate networks, and updated site safety and security information provided automatically to guests, contractors and employees every time they arrive.

REMOTE ACCESS CONTROL

Enables flexible, secure control of entrances and exits for security managers on the move, with real-time monitoring of access across single and multiple sites.

MOBILE VERIFICATION

Allows security spot-checks to verify credentials and ID, ensuring that only authorised people are in any given zone or building, and that health & safety, permits to work, and security validations are in order.

TRANSPORT

Manage your team shuttle operations more efficiently. Track transportation real time, and see who is in transit, and get early warning of disruption or delays, or of people missing their scheduled journeys or off sick.

GUARD TOUR & PATROL

Lets you monitor, verify and optimise guard patrolling activity 24/7 across single and multiple sites.

MAINTENANCE & SUPPORT REQUEST

Allows maintenance requests to be sent directly to the team responsible whilst being monitored and audited centrally. Improves efficiency and ensures a full H&S audit trail.

TARGETED AND MASS COMMUNICATIONS

Easily and quickly send essential updates and emergency alerts to individuals or groups, targeted by location, function or specific risk category, such as individuals with known vulnerabilities.
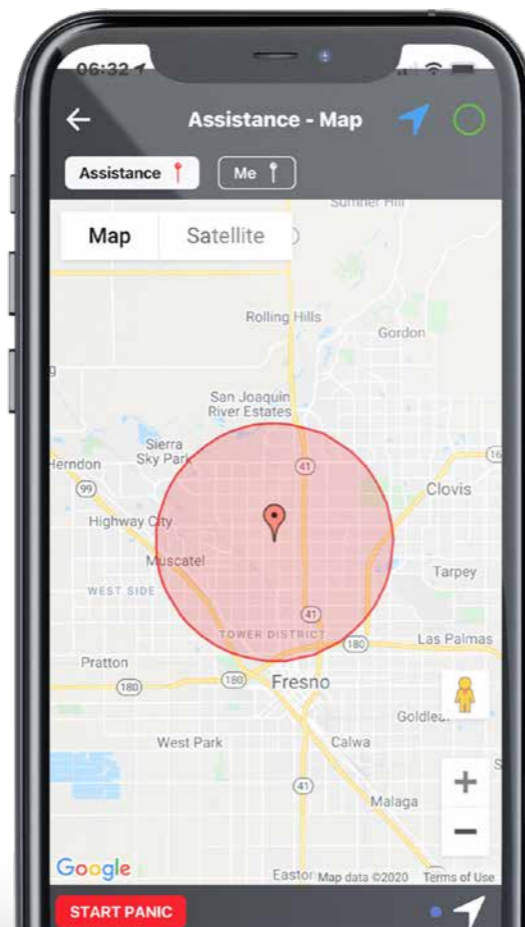

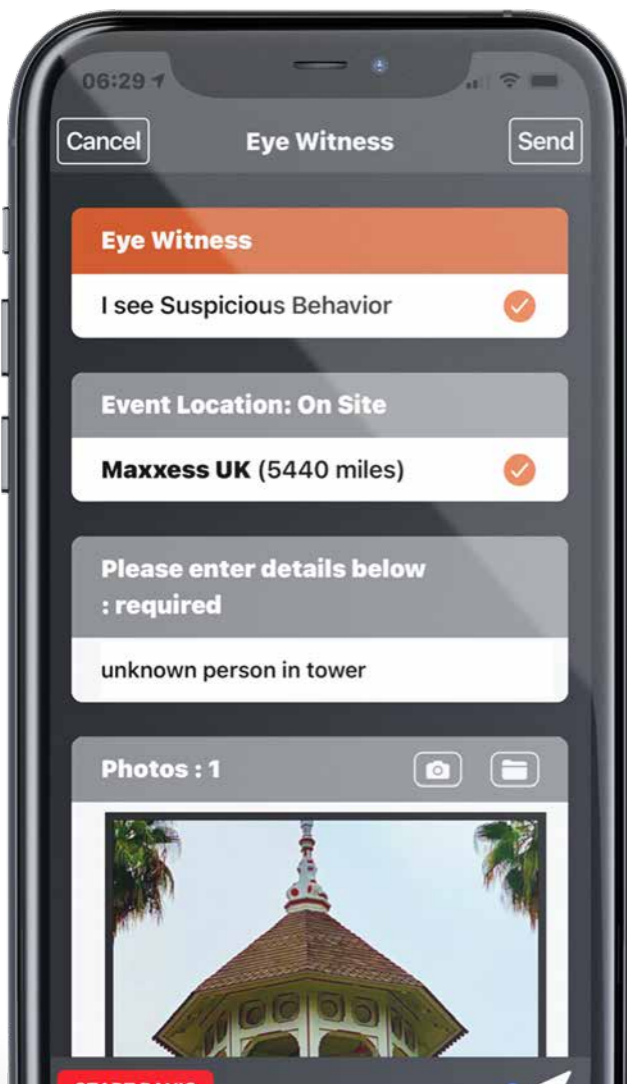

LONE WORKER MONITORING

Check, and monitor the safety of individuals working in isolation, out of hours, or in higher risk settings.

SOP COMPLIANCE

Lets you keep across events and activity on site to ensure correct operating procedures are followed, letting your team adapt to fast changing situations.

TAILORED TO YOUR NEEDS, MEETING YOUR ON-SITE CHALLENGES

A host of benefits for end users…

The eFusion security management platform gives end-users an open-technology alternative to costly PSIM solutions. Its building-block approach lets you integrate, customize, and adapt your systems to meet emerging challenges head on.

ADAPTABLE SOLUTIONS TO OPTIMISE OPERATIONS ACROSS ALL YOUR SITES

SCALABLE AND MODULAR

eFusion can be easily adapted for all applications, from small to large, with affordable licensing - meaning your only pay for what you use.

THE POWER OF A PSIM-STYLE MANAGEMENT PLATFORM, WITHOUT THE COST

An access control foundation that upgrades easily into a full security management platform – letting you shift up a gear when you need to.

ROBUST TECHNOLOGY THAT DELIVERS HIGHER SECURITY

eFusion provides full redundancy and uses link logic event programming to show real time alarm and video information.

OFF-THE-SHELF INTEGRATIONS, WITH NO CONFLICT

Seamless, conflict-free interoperability with leading vendor solutions makes it easy to simplify standalone technologies under one powerful interface.

BOOSTS OPERATIONAL EFFICIENCY ACROSS MULTIPLE FUNCTIONS

eFusion seamlessly works with Active Directory centralised databases to enable process-driven procedures for on-site contractor visits. It also integrates front of house and back of house operations, for example, in the hospitality sector, and can reduces the need for security guards by enabling central monitoring of multiple sites.

...and the right choice for systems integrators

DELIVERS COMPLETE SEAMLESS SOLUTIONS, EASILY

eFusion's multiple-manufacturer software and hardware platform, using industry standard OEM controllers, makes integration easy. eFusion software easily takes over from other manufacturers using the same OEM controllers.

INTEGRATES OFF-THE-SHELF, CONFLICT-FREE

eFusion lets you use multiple reader and credential technologies from different manufacturers. It integrates off-the-shelf with other vendor systems, without conflict.

A SOLUTION PROVEN GLOBALLY, GIVING YOU CONFIDENCE

eFusion gives you confidence, with pre-written A&E spec to industry standards, a proven track record and is trusted by major blue-chip and customers and well-known brands across the world.

CUSTOMISE AND ADAPT, TO MEET EVERY CUSTOMER'S PRIORITIES

eFusion is an adaptive solution, making it easy to meet each customer's particular priorities. It can integration to hotel front of house systems, allow cardholder screens and report templates to be customised, and when integrated with Active Directory allows for simple identity management.

FLEXIBLE AND POWERFUL, AN ORCHESTRATED APPROACH TO SYSTEMS STREAMLINING
